DETAILED ACTION

Claim Objections

Claim 21 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 21 recites a method, but is dependent from claim 17, which recites a bleaching line.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "a substantial portion" in claim 1 is a relative term which renders the claim indefinite. The term "a substantial portion" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Therefore, the amount of wash liquor supplied is indefinite.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent

Art Unit: 1731

and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 27-31 of copending Application No. 11/280,915. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the claims of '915 do not disclose expressly

Art Unit: 1731

multiple bleaching steps and an outlet end of the main conduit, at the time of the invention it would have been obvious to a person of ordinary skill in the art that a bleaching line implicitly indicates multiple bleaching steps, and since '915 discloses conveying wash liquor to the first wash apparatus through the main conduit, and discloses returning the filtrate to the main conduit, and doing so also with the second wash apparatus, a mass balance would require some method of removing fluid from the conduit in conjunction with adding wash liquor.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim 1 is provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 27-33 of copending Application No. 11/287,065. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the claims of '915 do not disclose expressly multiple bleaching steps, at the time of the invention it would have been obvious to a person of ordinary skill in the art that a bleaching line implicitly indicates multiple bleaching steps.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1 and 7 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 8, and 14 of copending Application No. 10/542,265. Although the conflicting claims are not identical,

they are not patentably distinct from each other because the claims of '265 encompass the instant claims 1 and 7.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1 and 17-24 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 12, 14-19, and 23-24 of U.S. Patent No. 7,077,931. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '931 encompass the instant claims 1 and 17-24, or are obvious variations thereof.
